

Projet Européen 2015-2016

Ensemble Scolaire Européen

Saint Régis-Saint Michel

Conseil Départemental

Mercredi 11 Mai 2016

RAPPEL :

Grandes lignes du
projet

1- Travail en interne et pluridisciplinaire

-Etude des mécanismes du changement climatique en Physique, en SVT et en Anglais.

-Préparation de diaporamas en Anglais.

-Présentation aux camarades de différentes classes et à l'équipe de direction.

To stop this,

Can - develop - public transports - and - green transports - or - walk

Emma et
Claire**

Global warming

Emma BERNARD et Claire JOUVE

5^{ème}8

- If the temperature increases
- sea level /rise/ and the coasts /flooded.

- *If the temperature increases, the sea level will rise and the coasts will be flooded.*

*If the temperature increases ,
icebergs/ ice cap/ melt.*

If the temperature increases , the icebergs and the icecap will melt.

- If the temperature increases,
- there more/storms, drought/forest fires

- If the temperature increases, there will be more storms, drought and forest fires

- If the temperature increases, some species
/PANDAS /disappear.

- If the temperature increases, some species , like **PANDAS** ,will disappear.

- If it is warmer / more diseases / more allergies and pollution

- If it is warmer, there will be more diseases, more allergies and pollution

but we can

change

everything

- Instead of using cars, /take a bike to go shopping
/ to go to school

- *Instead of using cars, we can take a bike to go shopping or to go to school*

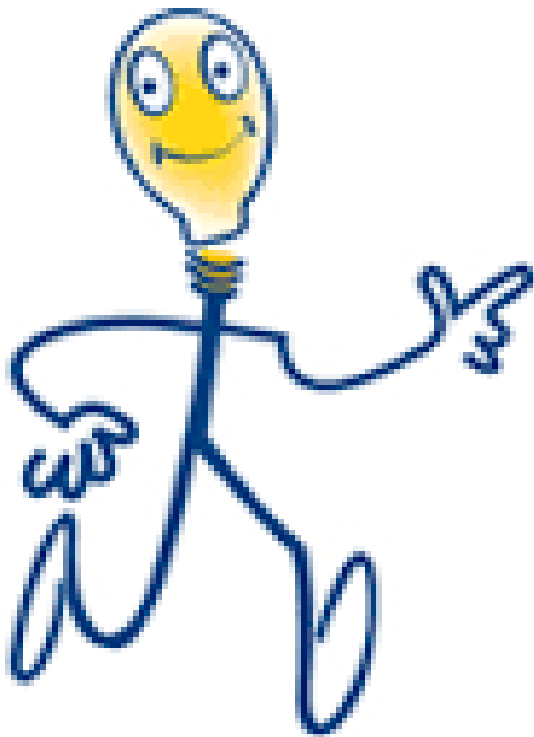

We /do carpooling (so /one car instead of 4)

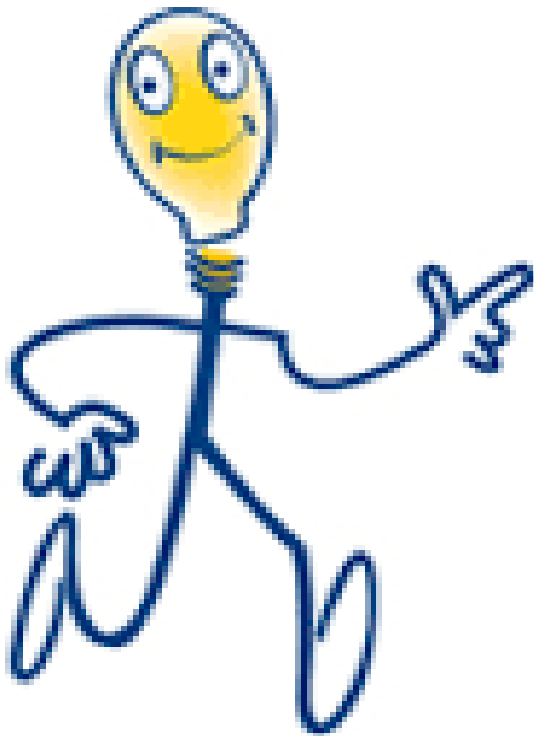

We can do carpooling, so there is only one car
instead of 4

- If /switch off the light / turn down the temperature, /save energy

- If we switch off the light and turn down the temperature, we can save energy

We /plastic / glass bottles and metal .

We / compost to produce less rubbish

*We must recycle plastic, glass bottles and metal.
We can make compost to produce less
rubbish .*

We / less paper and save trees.

We can use less paper and save trees.

We / save / water

SAVE IT
BEFORE YOU
NEED IT

In a five-minute shower we use 30 to 60 litres (8 to 16 gallons) of water.

We can save water

SAVE IT
BEFORE YOU
NEED IT

In a five-minute shower we use 30 to 60 litres (8 to 15 gallons) of water.

*We / use / solar energy and wind power /
pollute less*

*We can use solar energy and wind power to
pollute less*

If we want / we / the Earth.

If we want, we can save the Earth.

2- Travail avec notre partenaire anglais.

**VOYAGE A
CAMBRIDGE DU
21 AU 27 MAI**

Snow, icebergs

Melt

If the temperature
increases :

Sea level / rise

If the temperature increases and if there is too much rubbish, species :

- Die

- Become extinct

If the temperature increases,

- More droughts

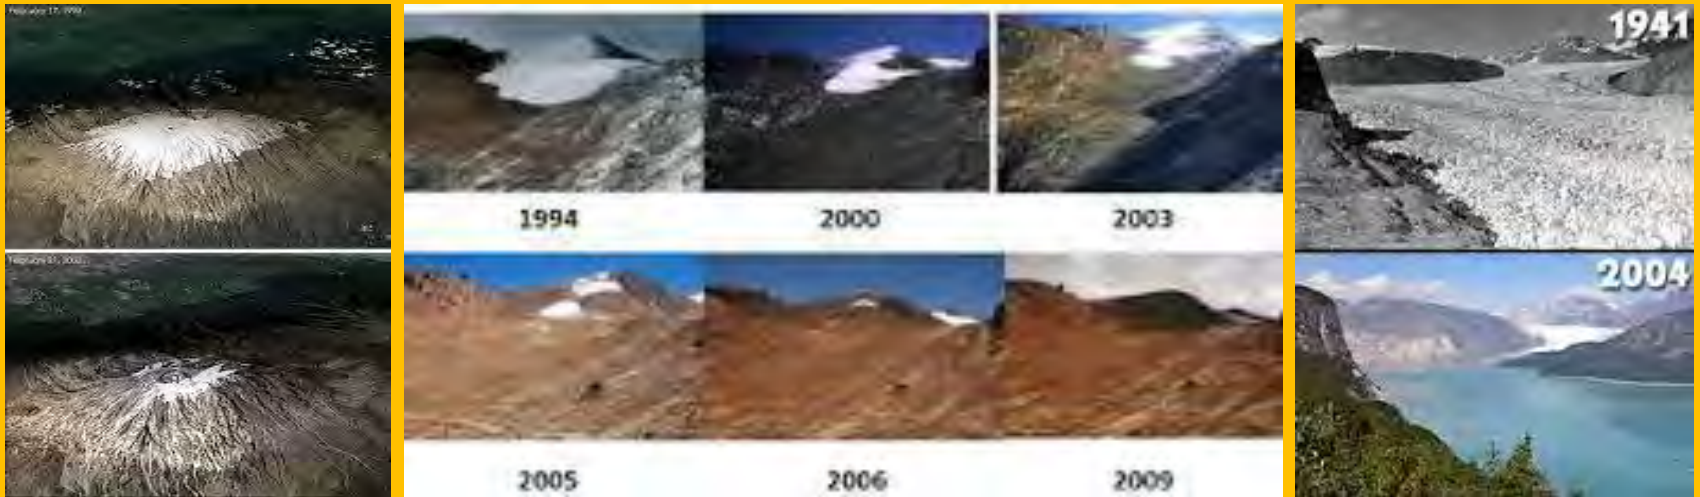

- More storms

- More wildfires

If the temperature increases,

- Glaciers of mountains

- Melt

Solutions

To stop this,

- Can / use

- Solar power
- Wind power
- Water power
- ...

To stop this,

Can - develop - public transports - and -
green transports - or - walk

Every day :

Reduce /
consumption
of water

Reduce /
consumption
of electricity

YES

Select / rubbish

NO

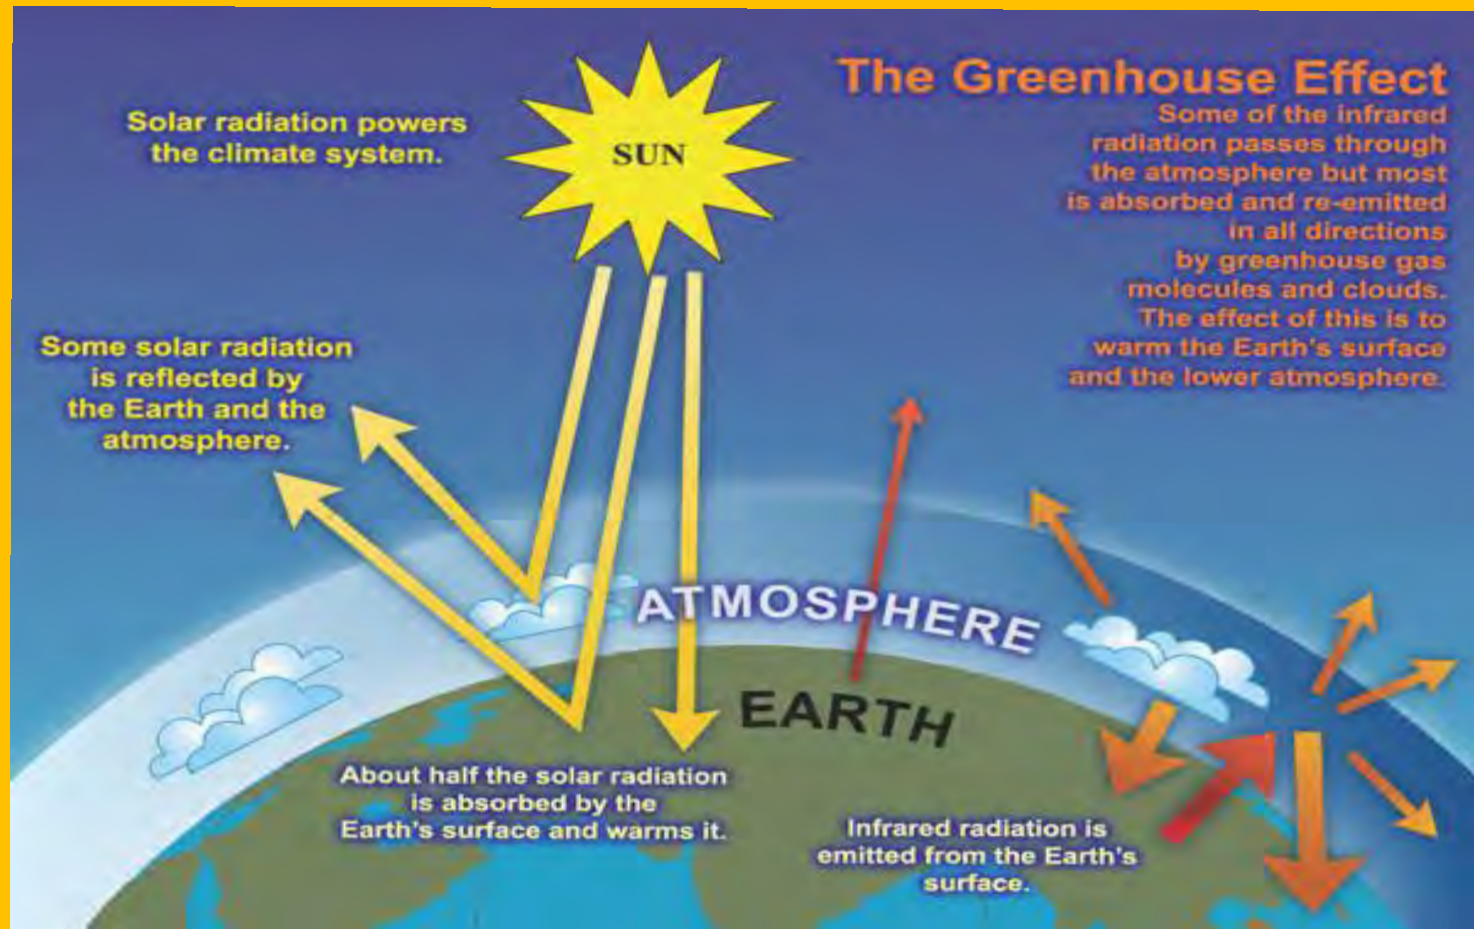

NO

If we want,
we can change everything.

Eva, Kenza et
Elisa**

The Global Warming

The sun rays warm the Earth and there are more greenhouse gases in the atmosphere, so the temperature increases.

If the temperature increases, the sea level will rise, and monuments will be under water. Then the coasts will be flooded. So life will be difficult.

If the temperature rises,
the snow and the icebergs
will melt.
So bears will disappear.

If the temperature increases, there will be more storms, more wildfires, and more droughts

If the temperature rises, many species will become extinct and many animals will die.

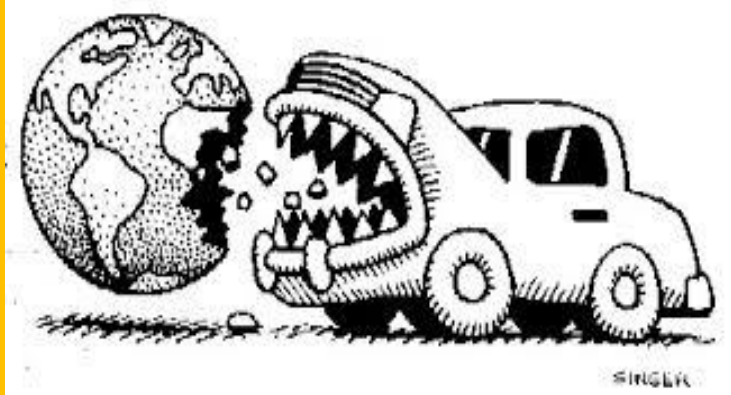

If the temperature rises, there will be more pollution, more diseases, and more allergies.

If we make efforts, our planet will be less polluted. So we can stop global warming.

Why don't we travel by bike or on foot ?
We can avoid using cars.

+ = -

+ D'ÉCO VOITURAGE = - DE CO₂

Quand écologie rime avec économie !

- Vous faites des économies en partageant les frais de déplacements en voiture. (Et tout ça avant même d'arriver au magasin !)
- Vous diminuez le rejet de CO₂ en n'utilisant qu'une seule voiture. (Faire ses courses n'a jamais été aussi bon pour la planète !)
- Vous pouvez bénéficier de remises plus conséquentes en effectuant vos achats en groupe. PLUS VOUS ACHÈTEZ, MOINS C'EST CHER !

PARTAGE Convivial Alternative
SIMPLE ÉCOLOGIQUE
Responsable RESPECT
COVOITURAGE économique

People can do carpooling.

We can save electricity.
When we leave a room, we
can switch off the light.
We must turn down the
temperature at home.

**ECONOMIE
d'ÉNERGIE**

Je sais faire !

Mémo-tri des emballages recyclables et des journaux-magazines

Everyone can recycle and make compost. There will be less rubbish on our planet.

We can save paper, so we could save trees.

DÉCOUVREZ LES CONSEILS DE LA BANDE DES BONS TUYAUX...

CONSEIL N°1
J'utilise le bocal plus pratique et économique que le jet d'eau pour nettoyer mes vêtements!

CONSEIL N°2
Je ferme le robinet quand je me lave les dents ou fais la vaisselle!

CONSEIL N°3
J'utilise le bouton «3 litres» en cas de petits besoins... c'est bien souvent suffisant!

A cartoon illustration of three water pipes with faces and arms. The pipe on the left is holding a green bucket. The pipe in the middle is holding a toilet brush. The pipe on the right is holding a toilet seat. They are standing on a blue background.

We can save water, have showers instead of baths.

We can use solar energy, and we can use wind power to pollute less.

When we build houses, we must insulate the walls and the windows to save energy.

We can save the planet if everyone makes efforts.

LET'S SAVE THE EARTH !!!!!!!
